

Vermont needs a universal system that is publicly financed through equitable taxes and fully meets our communities' healthcare needs.

We urge our elected officials to recommit to Act 48, which states: "The purpose of Green Mountain Care is to provide, as a public good, comprehensive, affordable, high-quality, publicly financed health care coverage for all Vermont residents in a seamless and equitable manner regardless of income, assets, health status, or availability of other health coverage." (33 V.S.A. § 1821)
