

# Guaranteed Primary Care for Every Vermonter!

Demand that all candidates support legislation to make primary care available for every Vermonter without cost, independent of private insurance, employment or income.

*Every Vermonter needs primary care. Whether it is to treat the flu, for a checkup, or to stitch you up after an accident, the Primary Care Physician is where most Vermonters get care for most of their medical problems.*

- Accessible primary care has been shown in numerous studies to be the single best step to improving population health. It is our first and best line of defense.
- Providing publicly funded primary care would lower health care premiums for everyone. (Vermont law does not allow private insurance rates to include services they do not pay for).
- Universal Primary Care is very inexpensive! It is less than 6% of total health care costs, and that is including outpatient mental health and substance abuse services
- Access to Primary Care will reduce the need for expensive hospitalizations and emergency room visits by treating conditions earlier and preventing disease.

**Universal Primary Care is the first step to a publicly financed universal health care system by Vermonters for Vermonters.**

*Saves Money, Saves Lives!*

# **UNIVERSAL PRIMARY CARE! NO DEDUCTIBLES - NO COPAYS!**

**Go to the doctor. Leave your wallet at home.**

**Make it a priority for all candidates!**

**Primary care for all Vermonters independent of  
health insurance, employment, or income!**
